Objective Summary

Utilize the skills I've learned through an intensive, hands on coding bootcamp and combine them with my previous leadership and team working skills to obtain a career in the tech industry

Technical Skills

C# | .NET Framework | ASP.NET | Entity Framework | Git | LINQ | HTML5 | CSS3 | Bootstrap | Agile | Fluent API | MVC

Soft Skills

Leadership | Organization | Communication | Collaboration | Positive Attitude | Quick Learner

Education

Software Development
Eleven Fifty Academy | Fishers, IN | April 2020

Projects

GameStash - https://github.com/spdwyer06/EFARedBadgeProject
Created a custom n-tier MVC application with full CRUD functionality, utilized Entity Framework to create multiple data tables with multiple data relationships.

Doughlicious - https://github.com/spdwyer06/EFA-Blue-Badge-Project
Worked in an agile environment to create a custom API, utilized Entity Framework to create custom data tables, collaborated using Trello, Slack, and GitHub, evaluated custom endpoints using Postman

Gold Badge Project - https://github.com/spdwyer06/GoldBadgeConsoleApplicationChallenges
Utilized repository patterns to build out three console applications in Visual Studio using C#, unit-tested all methods before applying to code, validated user input to create a positive user experience.

Professional Experience
